Installing the Leica Captivate Simulator App Provider

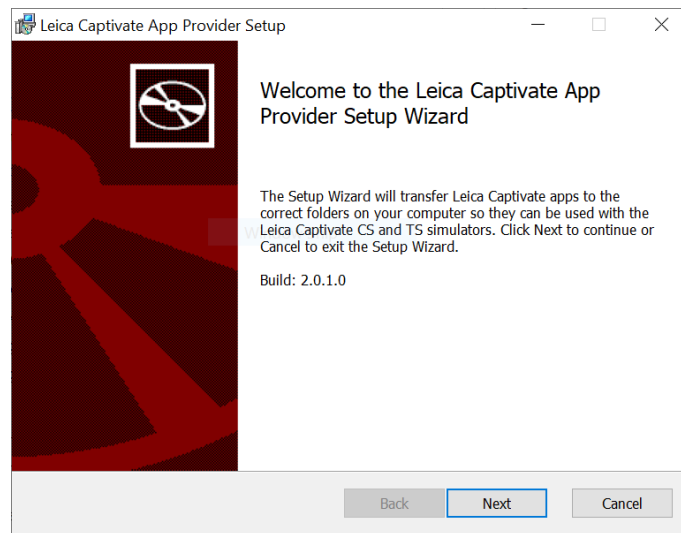

The Leica Captivate Simulator App Provider tool helps to install local apps to your Leica Captivate simulators. The tool places the app files in the correct folder to be taken by the simulators.

The following pictures will guide you through the installation steps:

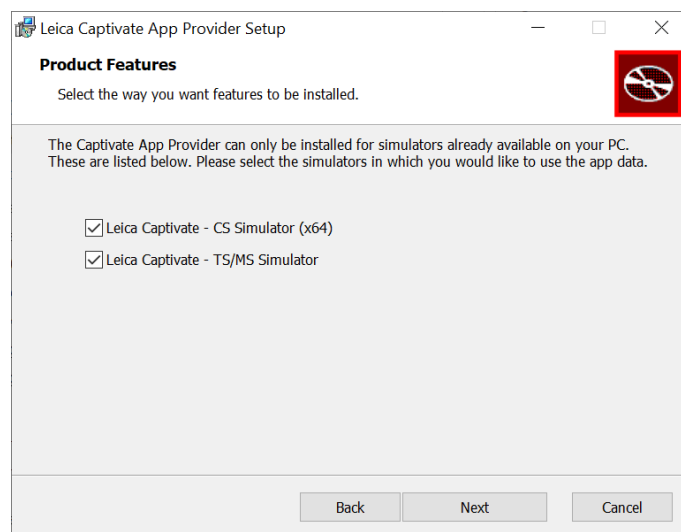

- 1) Start the application by double clicking it.

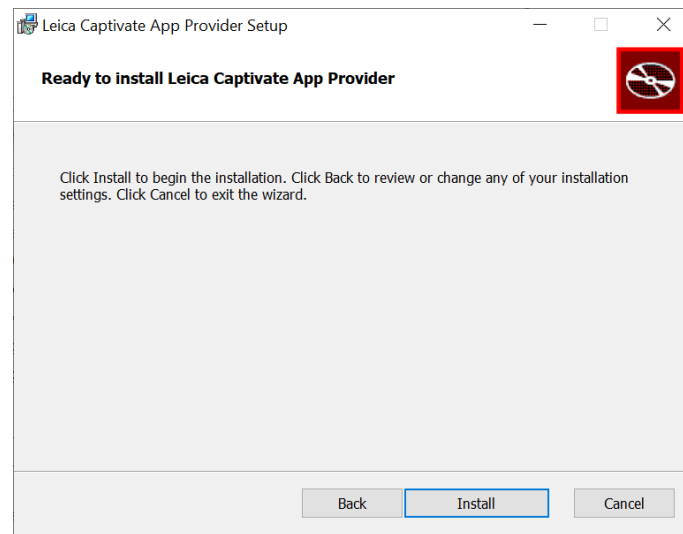

- 2) In the Setup Wizard press “Next”

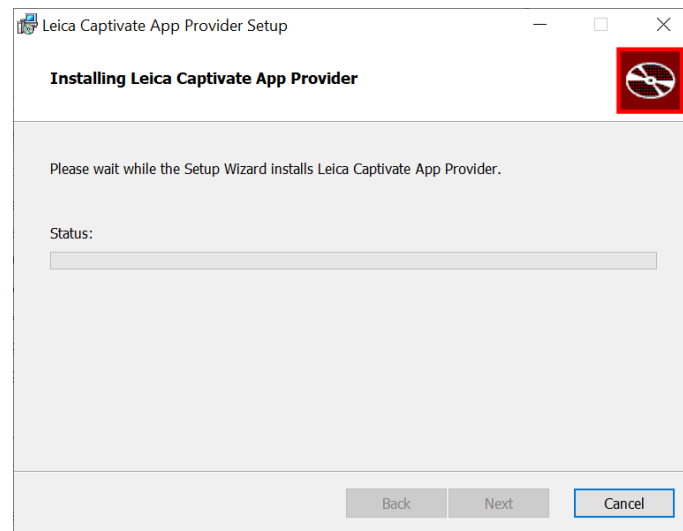

- 3) In this page select which simulators you will be using and press “Next”.

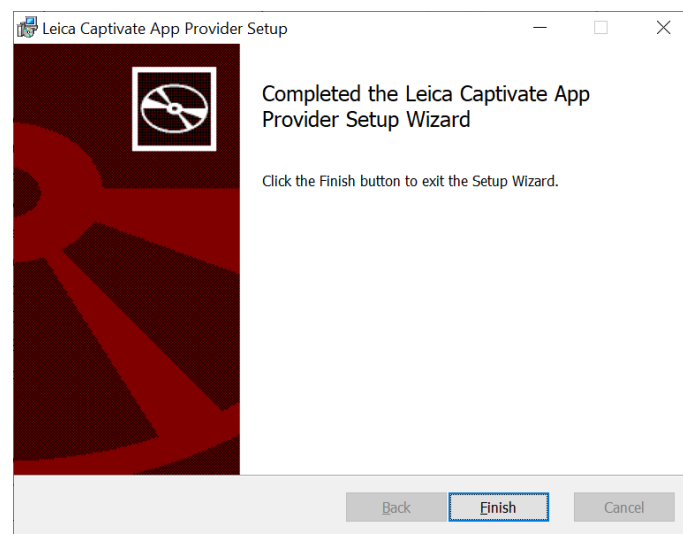

4) Click install in this page.

5) Wait for the installation to be completed.

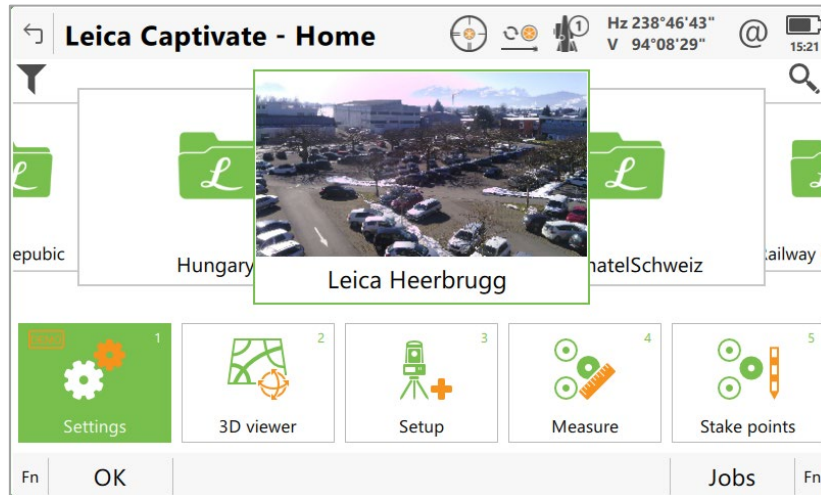

6) Once the installation is done, press **Finish**.

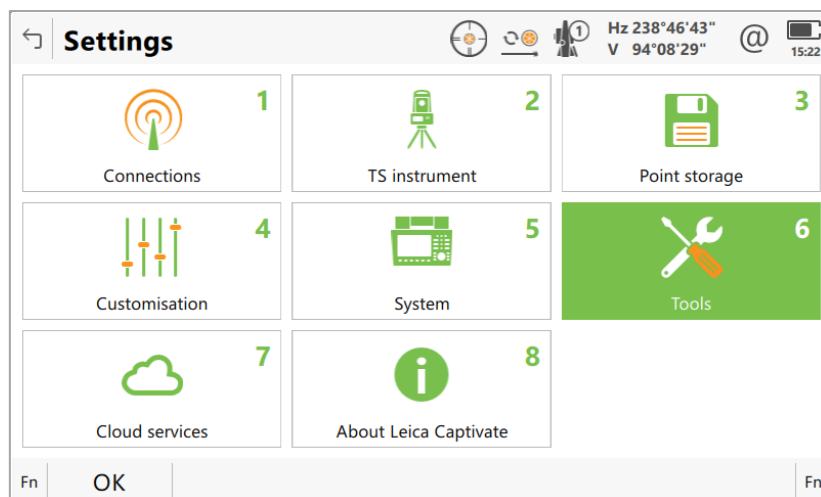

Now all the included app files are placed in the correct path. Please, switch the simulator on.

Loading the apps in Captivate

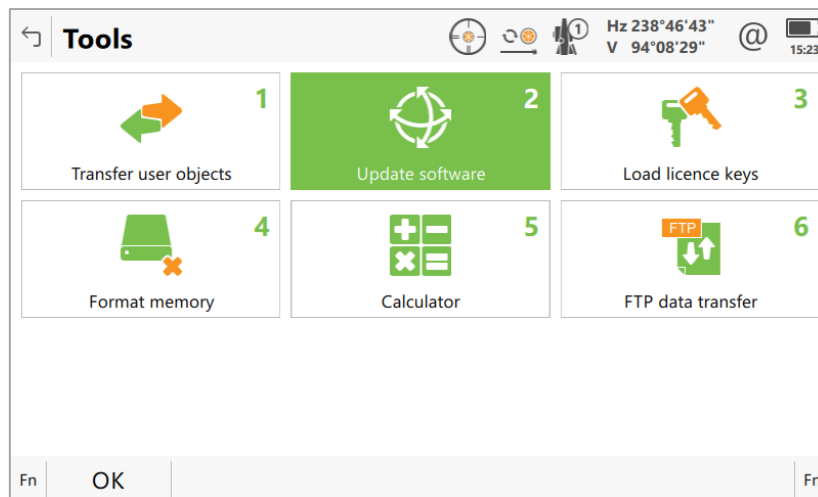

- 1) Press **Settings** in the home panel.

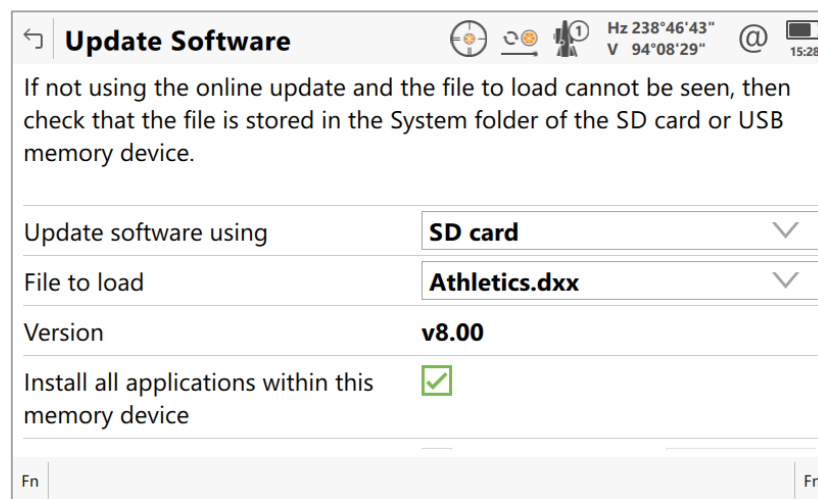

- 2) Press **Tools**.

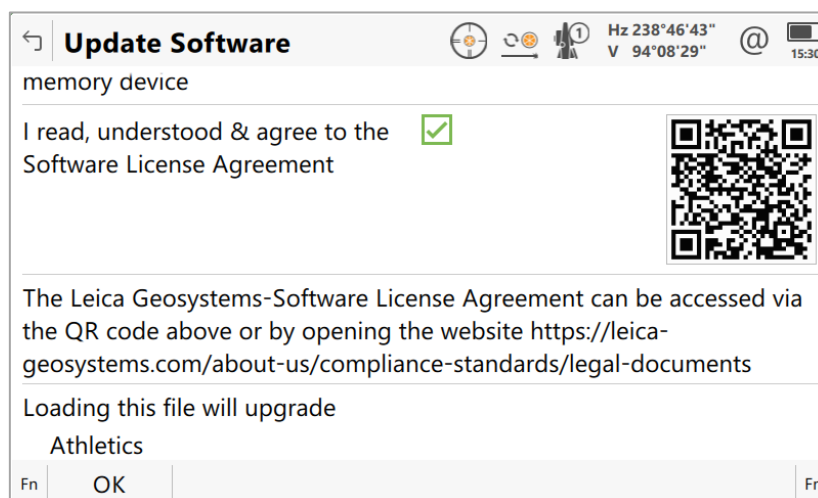

3) Press **Update software**

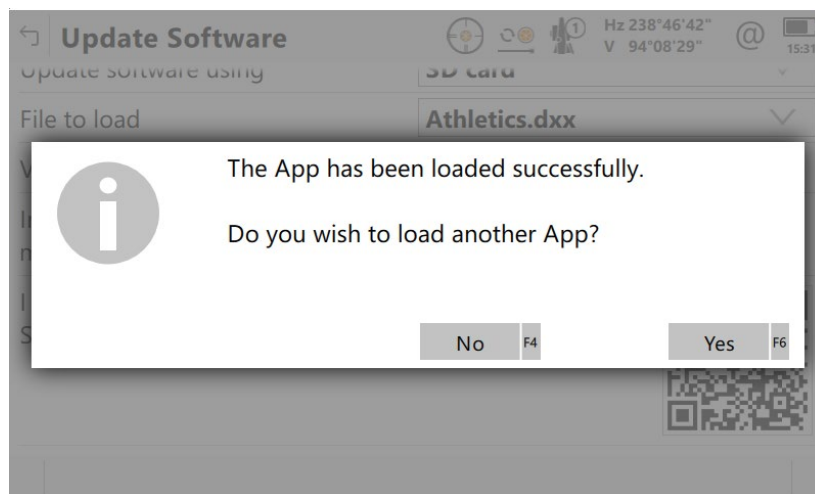

4) In the **Update software using** prompt, select the **SD card**.

5) Select the application you want to install. Tick the checkbox to install all the applications that are inside that folder. You will need to agree to the Software License Agreement. Press **OK**.

6) The following message informs about the successful installation.
